They all have the same thing wrong with them too, they all need to be tuned and cleaned although, cleaning is just portrayed by throwing a cup of water on the sodding thing.. Bought in the hopes that this could become a good game, when fully developed currently not worth playing.. In brief, this game can be fully experienced after just a few mouse clicks I wanna say it's not done but, it's been out for a while.. We do need more music games !! I don't know what i expected for 39 cents! Not recommended, for now at least, try to be a house flipper simulator V PC Building Simulator it has many bugs, for example when you try to repair an instrument sometimes it goes without fail or tells you that you must repair ropes but it does not have any money when buying instruments, money is not deducted from your money, can't even repair the instuments properly. So, I assume the creator has most likely abandoned it because they are the laziest person in the universe.. Hopefully the devs will impliment more instruments and things to do so I can edit my review.. Once you fix the instrument, you can collect your payment Game Features:* jobs related to repairing musical instruments* jobs related to used gear that can be resold* list of repairs that needs to be done to collect your payment b4d347fde0Title: My First Music WorkshopGenre: Indie, Simulation, Early AccessDeveloper:BuzzTwinPublisher:Casual.. The first thing that i noticed was that there was only one instrument to do something with, a guitar.. All this does is make you more money but, shortly after repairing a few guitars and making a couple hundred bucks in the span of thirty seconds, I found that there wasn't anything to work towards.. There is nothing to spend your money on except for guitar parts and it only takes half of your income from repairing one guitar to pay for those..
